

SHREE NARANJIBHAI LALBHAI PATEL COLLEGE OF PHARMACY, UMRACH

Guest lecture report

Date: 15-03-2019

Guest Speaker: Dr. Paramjit Singh
M.Pharm., Ph. D.
Principal Scientist,
Zoetis Pharmaceutical Research Private Limited
(formerly Pfizer Animal Health), Mumbai

Topic: Pharmaceutical Research and Development (R&D):
Challenges & Opportunities

Students Present : B. Pharm. (55) & M. Pharm. (15)

Summary of Lecture:

Frequently, it is observed that pharmaceutical industry and academia work in different directions. Academic studies and research involves understanding basics of science and its relations with pharmaceuticals. But its real application into pharmaceutical work at industrial level is missing. There is a gap between training done in academic institute vs expectation of industry.

In this lecture , Dr Paramjit Singh has discussed various point which will be acted as a gap filler between the academics and industry. Sir has also detailed the various departments and work culture of the R & D setups. Sir has discussed some case studies which helped the student to correlates their current knowledge with the industrial point of view. This presentation will help the student to prepare better and be ready to become a successful Pharmaceutical scientist.
