From Principal's Desk

Dr. Ketan V. Shah

An essential component of society's overall development is education. There is little doubt that education plays a function beyond simply imparting and absorbing theory and knowledge. The real purpose of education goes much beyond merely giving students diplomas and degrees. "By education I mean an all-round drawing out of the best in child and man-body, mind and spirit," as Mahatma Gandhi once stated. The ultimate aim of education is to find the meaning of life and to fulfill oneself, as well as all of humanity. Knowledge, humanity, culture, wisdom, and sharpness are the goals of education; yet, it should be remembered that character is developed rather than given, and knowledge must be earned.

Shree Naranjibhai Lalbhai Patel College assists in the development of a student's personality, extracurricular activities, and overall worldview in addition to its theoretical education. We have all the qualities of a top-notch institution: a well-trained faculty, an extensive library, a placement office, innovative teaching strategies, and freedom to think and express oneself. The goal of higher education in rural areas is linked to employment because it guarantees a good attitude to view the world from a better perspective and to evaluate, identify, and apply a person's ideas in a way that contributes to the positive development of society. I genuinely think that there is more to our college than just education. It offers you an opportunity to develop by providing you with all the tools you need to succeed.

It is a matter of great pride and satisfaction for SNLPCP to bring out the magazine PHARMVIDYA. The college has made tremendous progress in all areas- academic, non-academics, capacity building relevant to staff and students. The College has achieved another milestone in getting NBA (National Board of Accreditation). I am confident that this issue of PHARMVIDYA will send a positive signal to the staff, students and the person who are interested in the technical education and Technology based activities. A magazine is like a mirror which reflects the clear picture of all sorts of activities undertaken by a department and develops writing skills among students in particular and teaching faculty in general. I congratulate the Editorial Board of this magazine who have played wonderful role in accomplishing the task in Record time.

ABSTRACT:
Cubosomes, also known as bicontinuous cubic phase liquid crystals, are nanoparticles with a specific ratio of amphiphilic lipids as their major constituents. Cubosomes are typically created by hydrating a surfactant or polar lipid that produces a cubic phase and then dispersing it into smaller particles. They operate with solids similar to rheology peculiarities of practical use. They have carvenous (honeycomb) structures that are tightly packed and twisted into three-dimensional bilayers, and they are thermodynamically stable. They can load more drugs because of this type of sophisticated structure. Cubosomes are capable of encapsulating hydrophobic

A Journey in white coats

In halls of learning, where white coats gleam,
Young minds gather, chasing a dream.
With textbooks heavy and notes piled high,
They laugh and they learn as the days go by.
From B.Pharm's first steps to Mpharm's deep dive,

They study the science that keeps us alive.
Potion and pills in bottles so neat -
Each one a promise, a cure to meet.
But the road isn't easy, the nights can be long,
With exams and deadlines where things can go wrong.

Still they push through with grit and with grace.
Fueled by purpose, they quicken the pace.
Each tablet dispensed, every counsel shared,
Is a thread in fabric of lives repaired.
From students to healers, their journey unfolds,

In stories of wellness, their legacy holds.
