Only Women Vaccination will Eradicate HPV from India?

Date: 9th April 2025

Venu: W-Wing Auditorium

Participants: 250 Students from B. Pharm and M. Pharm

The Vaccination for Cervical Cancer awareness program organized by Shree Naranjibhai Lalbhai Patel college of pharmacy on dated 9th April 2025 at seminar hall, aimed to Informing students about cervical cancer vaccination, its symptoms, and the importance of early detection. Recognizing that many people lack access to accurate information and resources, the program sought to empower attendees through knowledge and practical tips. The objectives included increase awareness about cervical cancer and its impact on women's health, promote preventive measures such as the HPV vaccination and regular Pap smear screenings, encourage open discussions about women's health and eliminate stigmas surrounding cervical cancer and HPV, and provide resources for women to access reliable information on cervical cancer prevention and screening options.

The program was started by the introductory speech of Ms. Pooja R. Mistry followed by the speech of Guest speaker Mr. Jigar K Pandya who is ABM (Area Business Manager) at head of Surat and Bhavnagar district at Serum Institute of India Pvt Ltd. The program featured covering topics such as symptoms, prevention, and the significance of early detection through Pap smears and HPV tests, focused on understanding the HPV virus, the role of vaccination, and how it can prevent cervical cancer, causes of cervical cancer, effects of HPV on women, who are at risk and treatment option if someone is suffering from this disease. Interactive presentations and Q&A sessions engaged participants effectively. Additionally, He explained why vaccination is important for males too and He shared her professional experience with us to understand about this disorder. Moreover, speech was delivered by our principal sir Dr. Ketan shah sir too. At last coordinator Ms. Pooja R Mistry gave vote of thanks to speaker, respected principal sir, teaching and non-teaching staff and students. Overall, The Vaccination for Cervical Cancer Awareness Program has been an essential step toward educating the college community about a critical health issue. The program not only raised awareness but also provided practical solutions such as access to vaccinations and screenings. Moving forward, it is recommended to continue these educational initiatives annually and work on strengthening the collaboration with healthcare providers for even better outreach and services.
