Theme: "Your Safety, Just a Click Away: Report to PvPI"

No. of Participants for Quiz: 191

No. of Participants for Essay: 12

Summary of National Pharmacovigilance Week celebration:

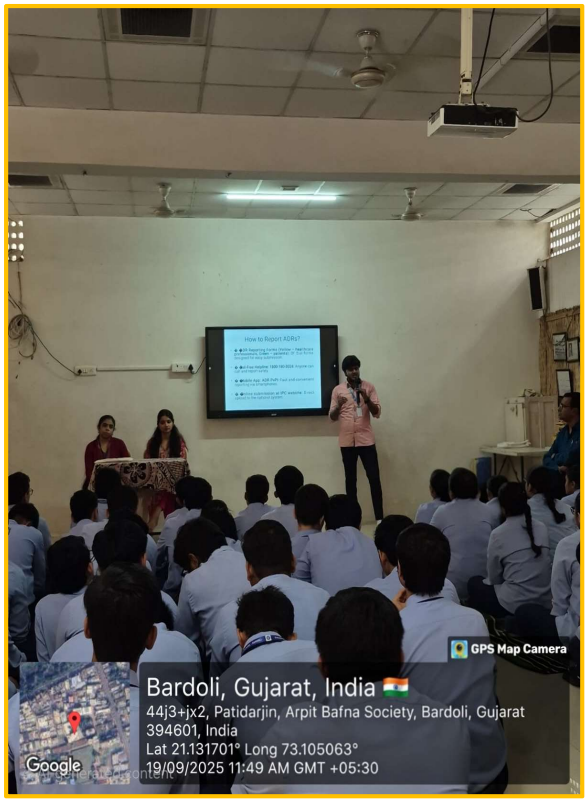

"National Pharmacovigilance Week" was celebrated at Shree Naranjibhai Lalbhai Patel College of Pharmacy from 17th to 23rd September 2025 with the goal of raising awareness about the importance of reporting adverse drug reactions (ADRs) and fostering a strong culture of pharmacovigilance in India. This year's theme, **"Your Safety, Just a Click Away: Report to PvPI"**, encouraged the use of digital tools and simplified reporting mechanisms in alignment with the national campaign.

To mark the week, the college organized a set of engaging events including an online quiz, an essay competition, and outreach awareness programmes. The quiz competition, held on 17th September, saw enthusiastic participation from 191 students. On 19th and 20th September, our team led awareness sessions in different local schools in Bardoli — namely, M.B. Vamdot High School, BABS High School, Sincerite English Medium School, Sardar Patel High School, SBR High School, J.M.Patel School, Nalanda School,G.H. Bhakta School, Freedom Valley School&Jay Ambe Vidhyabhavan, B.B.S.H.K. School in Karcheliya, Shree S.G. High Schhol,Valod, MAA Shivduti English Medium Science School& P.P.Savani School,Vyara— where interactive talks, discussions, and informative materials were shared to convey the theme and practices of ADR reporting. The essay competition, with 12 student participants, provided another platform for reflecting on drug safety, ADRs, and the importance of pharmacovigilance.

The entire programme was coordinated by Dr. Tanvi H. Desai and Mrs. Priyanka R. Chaudhari under the guidance of Dr. Ketan Shah (Principal, SNLPCP), with active support from all faculty members. To honour engagement and effort, **e-certificates** were awarded to all participants in both the quiz and essay competitions, reinforcing the value of their contributions to the pharmacovigilance awareness drive.

Benefits of Reporting ADRs
Early detection of drug safety issues: Helps identify risks before they spread.
Improved patient safety: Protects patients from harmful drug effects.
Safer prescribing and dispensing practices: Doctors and pharmacists get updated information.
Regulatory actions (warnings, label updates, drug withdrawal if needed): Authorities can take action to protect public health.

15th NATIONAL Pharmacovigilance WEEK

"Your Safety Just a Click Away: Report to PvPI."

In today's rapidly evolving healthcare landscape, medicines play a vital role in diagnosing, treating, and preventing diseases. However, while drugs offer tremendous benefits, they may also cause adverse effect, especially when misused or not monitored Correctly. Recognizing this, the Government of India established the Pharmacovigilance Programme of India (PvPI) with a clear mission: to ensure drug Safety For the Indian population.

The slogen "your Safety Just a Click Away" highlights the Conveniece and accessibility Provided by PvPI. With digital platforms, reporting Side effects or medicine-related Problems has becomes easier, faster, and more reliable. The initiative empowers patients, doctors, pharmacists, and healthcare workers to participate actively in Strengthening the Safety of medicines available in the Country.

5th National Pharmacovigilance Week

"Your Safety Just A Click Away: Report To PVPI"

Medicines are an essential part of modern healthcare. They prevent diseases, manage long-term conditions, and save lives in critical situations. However, no medicines is entirely free from risk. Along with their benefits, medicines may sometimes cause unwanted or unexpected effects. These effects are known as adverse drug reactions (ADRs). While some ADRs are mild, others can be serious, affecting a patient's quality of life or even leading to hospitalization. Because of this, medicine safety has become an important responsibi-lity not only for doctors and pharmacists but also for patients themselves. In India, this responsibility is addressed through the pharmacovigilance Programme of India (PvPI).

PvPI was launched in 2010 by the India Pharm-acopoeia Commission under the Ministry of Health and Family Welfare. Its goal is to monitor the safety of.
